Date:

MODULAR WATER-SOURCE VRF HEAT PUMP SYSTEM

FEATURES

- · Single modules up to 20 tons with the ability to combine single modules for systems up to 30 tons
- 208/230V, 3-Phase, 60Hz and 460V, 3-Phase, 60Hz options
- Designed for closed water loops
- · Dual heat recovery from water loop and refrigerant circuit
- · 0-10V output signal to modulate water flow for compliance with energy codes
- Features Variable Evaporating Temperature (VET) technology, which enables the outdoor unit to raise the target evaporation temperature based on the difference between set point and return air temperature, saving energy.
- Water flow can be stopped while the unit is in a thermo-off state, saving on pump energy consumption. For twinned systems, both modules must be thermo-off to stop water flow.
- · Enhanced water-side heat exchanger design for improved efficiency and reduced risk of clogging
- · Self-cooling cabinet design
- Inlet water temperature range: 23-113° F
- Max. Total Refrigerant Piping Length: up to 2,460 feet based on model
- Connects to CITY MULTI[®] indoor units; controlled via CITY MULTI[®] Controls Network (CMCN)
- External finish: Acrylic-painted steel
- · Stack multiple units on a field-supplied rack to take advantage of vertical space when available
- Extended 10-year parts and compressor warranty available

ACCESSORIES

- □ Twinning Kit (required) (CMY-Q100CBK2)
- □ Joint Kit (for details see Pipe Accessories Submittal)
- BC Controller (for details see BC Controller Submittal)
